DETAILED ACTION

This office action is in response to the Amendment filed 28 November 2005.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Herbert Dubno on 10 February 2006.

The application has been amended as follows:

Specification, Page 9, line 23, "12" has been replaced with --13--

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Per the above Examiner's Amendment, applicant should change the number referring to the heating element in Figure 1 to --13--. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Allowable Subject Matter

Claims 1 and 5 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record neither teaches nor suggests the claimed method of making a sample tube including injection molding an intermediate tube with a conical intermediate bottom spaced between the ends of the intermediate tube and heating and pressing edges of an end of the intermediate molded tube toward an axis of the intermediate tube to thermally reform the tube and provide an only partially closed bottom end for the sample tube.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patent shows the state of the art with regard to tubes having intermediate bottoms:

U.S. Patent 5,948,365 to Macy et al. (It is noted that the tube is completely closed at the very bottom of the tube.)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monica A. Huson whose telephone number is 571-272-1198. The examiner can normally be reached on Monday-Friday 7:30am-5:00pm.

Art Unit: 1732
